

# Bank Reconciliation Automation for Multi-Bank Environments Training Course

OGI-1143 · 5 days · 15 CPD hours · English

## Overview

---

The Bank Reconciliation Automation for Multi-Bank Environments Training Course from [Institute For Oil & Gas Training](#) develops practical capability in Bank Reconciliation across complex oil and gas treasury operations. The course focuses on automating reconciliation processes, strengthening bank statement import controls, and integrating bank activity with ERP bank ledgers across multi-bank environments.

Oil and gas organisations operate with high volumes of financial transactions across operating companies, subsidiaries, joint ventures, project entities, escrow arrangements and international banking relationships. Treasury teams frequently manage several banks, multiple currencies, different statement formats, separate project accounts and distinct approval structures. These conditions create reconciliation challenges that require structured processes, reliable data flows and disciplined exception management.

Manual reconciliation becomes increasingly difficult when transaction volumes increase and banking data arrives through different channels and formats. Bank statement import processes need to convert external banking information into usable ERP data without compromising transaction integrity. MT940 and BAI2 formats provide important mechanisms for structured bank reporting, while modern treasury and ERP environments require professionals to understand how these formats interact with automated reconciliation processes.

This course addresses the operational skills required to establish effective auto-matching rules, investigate unmatched transactions and manage exception handling in a controlled manner. It also examines how reconciliation processes support accurate cash visibility, ledger integrity and treasury control. Participants work with scenarios involving deposits, payments, bank charges, transfers, interest entries, foreign exchange movements, intercompany transactions and other banking activity relevant to petroleum operations.

Multi-currency bank accounts create additional reconciliation requirements because transaction currencies, account currencies and reporting currencies can differ. Professionals responsible for treasury, finance and accounting need to distinguish transaction-level differences from foreign exchange differences and understand how exchange rates affect the reconciliation process. The course therefore incorporates practical approaches for reviewing currency differences and maintaining reliable financial records.

ERP bank ledger integration is another central focus. Effective automation depends on accurate mapping between bank transactions and the relevant general ledger, cash accounts, clearing accounts and sub-ledgers. Participants examine the controls required to support reliable data transfer, transaction matching and reconciliation status management between banking platforms and ERP environments.

The course also addresses escrow and project account reconciliation, which are particularly relevant to capital-intensive oil and gas activities. Project accounts can contain restricted funds, contractor payments, financing movements, project receipts and other transactions that require clear reconciliation procedures. Participants explore

methods for distinguishing operational transactions from project-specific movements and for maintaining appropriate audit trails.

Joint venture bank account reconciliation receives dedicated attention because petroleum projects often involve multiple participating parties and complex cash arrangements. Participants examine reconciliation approaches for joint venture accounts, partner contributions, operator payments, shared costs, distributions and intercompany or partner-related transactions. The focus remains on accurate transaction identification, supporting documentation and transparent reconciliation records.

Institute For Oil & Gas Training delivers the course with an industry-focused approach that connects treasury controls with the realities of petroleum finance. The emphasis is on practical application rather than theoretical accounting instruction. Participants develop processes that support faster reconciliation, stronger exception management, improved cash visibility and more reliable bank-to-ledger information.

The course is designed for organisations seeking to improve the quality and consistency of reconciliation across multiple banking relationships. It supports treasury transformation programmes, ERP implementation initiatives, finance process improvement and the transition from manual reconciliation towards controlled automation.

## Objectives

---

- Develop advanced practical capability in Bank Reconciliation for multi-bank oil and gas environments.
- Establish structured processes for importing bank statements into treasury and ERP environments.
- Understand MT940 and BAI2 formats and their relevance to automated bank transaction processing.
- Design effective auto-matching rules for common banking transactions.
- Establish controlled approaches to exception handling and unresolved transaction investigation.
- Improve reconciliation processes for multi-currency bank accounts.
- Strengthen ERP bank ledger integration and transaction mapping controls.
- Reconcile escrow and project accounts using structured transaction analysis and supporting documentation.
- Apply appropriate processes to joint venture bank account reconciliation.
- Identify timing differences, duplicate transactions, unidentified entries and posting discrepancies.
- Improve the quality of reconciliation evidence and audit trails.

- Strengthen coordination between treasury, accounting, project finance and joint venture functions.
- Improve cash visibility through timely and accurate reconciliation.
- Support the transition from manual reconciliation towards controlled automation.
- Establish reconciliation controls that align transaction processing with financial reporting requirements.
- Improve the investigation and resolution of reconciliation exceptions.
- Develop practical reconciliation procedures suitable for complex petroleum organisations.

## Training methodology

---

Institute For Oil & Gas Training uses a practical corporate delivery model built around realistic treasury and finance scenarios. The methodology combines technical explanation with case studies, reconciliation simulations, group exercises, transaction analysis and process design activities.

Participants examine sample bank statements and transaction populations representing the types of information encountered in multi-bank environments. Exercises focus on identifying transaction references, dates, amounts, currencies, account identifiers, payment information and other data required to establish effective matching logic.

Case studies demonstrate how bank statement import processes operate within wider treasury workflows. Participants assess structured banking information and examine how MT940 and BAI2 formats support automated processing. They consider the impact of inconsistent references, incomplete transaction descriptions, duplicate entries and differences in bank reporting structures.

Auto-matching rule exercises allow participants to develop practical matching criteria based on transaction characteristics. These exercises address exact matches, reference-based matching, amount and date tolerances, recurring transactions and controlled matching hierarchies. Participants also assess situations where automation should stop and human review should begin.

Exception handling simulations focus on unresolved and unusual transactions. Participants investigate unmatched receipts, unidentified payments, bank charges, duplicate entries, timing differences and transactions requiring additional documentation. The exercises reinforce the importance of assigning ownership, recording investigation results and maintaining a clear reconciliation trail.

Multi-currency scenarios introduce foreign currency bank accounts and transactions. Participants review currency conversion differences, exchange rate impacts and reporting requirements while maintaining the distinction between genuine reconciliation differences and accounting differences caused by currency movements.

ERP integration exercises examine the relationship between bank data, cash accounts, general ledger postings and reconciliation status. Participants review transaction mapping and consider the controls required to prevent incorrect postings, duplicate entries and incomplete bank-to-ledger integration.

Project account and escrow scenarios provide practical exposure to restricted funds and project-specific transactions. Joint venture case studies address partner-related bank activity and reconciliation responsibilities. Group exercises require participants to design practical workflows that support transparency between treasury, finance, project accounting and joint venture teams.

The methodology encourages participants to assess existing processes, identify control weaknesses and develop structured improvements. The emphasis remains on applying the principles directly within corporate treasury and finance environments.

## **Organisational impact**

---

Effective reconciliation directly supports the integrity of treasury and financial information. Organisations completing this course gain stronger internal capability for controlling bank-to-ledger processes across multiple banking relationships.

Automated reconciliation reduces dependence on repetitive manual transaction comparison. Properly configured processes allow routine transactions to be identified systematically while directing unusual transactions towards controlled review. This creates a clearer separation between automated processing and human investigation.

Improved bank statement import procedures strengthen the consistency of incoming banking data. Organisations benefit from clearer processes for handling different statement formats and establishing reliable links between external bank information and internal financial records.

Strong auto-matching rules improve transaction processing discipline. Matching logic based on appropriate references, amounts, dates and transaction characteristics helps finance teams process recurring activity consistently while reducing inappropriate manual intervention.

Effective exception handling provides greater visibility over unresolved transactions. Rather than allowing unmatched entries to remain unexplained, structured exception workflows establish responsibility for investigation, documentation and resolution. This supports better management reporting and more reliable reconciliation status information.

Multi-currency reconciliation capability strengthens cash and financial control across international operations. Organisations gain better processes for distinguishing exchange-related movements from genuine bank-to-ledger discrepancies and for maintaining accurate records across different currencies.

ERP bank ledger integration supports stronger data consistency between treasury operations and financial accounting. Proper integration reduces fragmented processing and improves visibility of how bank transactions are reflected in the ledger.

Escrow and project account reconciliation improves control over funds associated with specific projects and contractual arrangements. Clear reconciliation procedures help finance teams identify project receipts, payments, transfers and restricted funds while maintaining appropriate supporting records.

Joint venture bank account reconciliation capability supports greater transparency in operator and partner financial processes. Structured reconciliation helps teams identify partner contributions, shared payments, distributions and

other joint venture banking activity.

The organisational outcome is a more controlled reconciliation environment with clearer processes, better exception visibility and stronger information flow between treasury and accounting. These improvements support operational efficiency and strengthen the reliability of cash information used for financial management.

## Personal impact

---

Participants develop practical skills that directly support treasury, accounting and financial control responsibilities. They gain a structured understanding of how automated Bank Reconciliation works within a complex corporate banking environment.

The course strengthens participants ability to interpret bank statement information and identify the transaction data needed for reliable matching. They learn how statement formats influence import processes and how transaction information is transferred into reconciliation workflows.

Participants also gain stronger capability in designing and reviewing auto-matching rules. This supports more effective interaction with treasury technology, ERP systems and finance transformation teams.

Exception investigation becomes more structured. Participants learn to analyse unmatched entries, identify the source of discrepancies and establish appropriate resolution procedures. This improves their ability to manage reconciliation issues without relying solely on manual trial and error.

The course also strengthens understanding of multi-currency reconciliation. Participants develop practical awareness of currency differences and the importance of distinguishing bank transaction discrepancies from accounting movements arising through foreign exchange.

Professionals responsible for ERP environments gain greater insight into bank ledger integration. This helps them communicate more effectively with treasury technology teams, finance systems specialists and ERP implementation teams.

Participants working with projects and joint ventures gain practical knowledge of specialised reconciliation requirements. They develop processes for reviewing project accounts, escrow transactions and joint venture bank activity with greater consistency.

The capability developed through the course supports progression into broader treasury operations, cash management, financial control and finance transformation responsibilities. Participants also gain a stronger ability to contribute to process improvement initiatives involving banking automation and ERP integration.

## Who should attend

---

- Treasury Managers and Treasury Specialists — responsible for bank relationships, cash visibility, reconciliation and treasury controls.
- Cash Managers — focused on daily cash positions, bank transactions and account-level reconciliation.

- Treasury Accountants — responsible for bank accounting, transaction matching and reconciliation activities.
- Financial Accountants — require stronger control over bank-to-ledger accuracy and financial records.
- General Ledger Accountants — benefit from improved understanding of bank transaction integration and clearing processes.
- Finance Managers — oversee reconciliation controls and financial process performance.
- Financial Controllers — require stronger visibility over reconciliation integrity, exceptions and financial control.
- Accounts Receivable Managers — manage incoming bank receipts and transaction identification.
- Accounts Payable Managers — manage payment transactions and bank clearing activity.
- Project Accountants — handle project bank accounts, project receipts, payments and account reconciliation.
- Joint Venture Accountants — require specialised capability in joint venture bank account reconciliation.
- Petroleum Finance Professionals — need reconciliation capability aligned with complex oil and gas operating structures.
- Treasury Operations Teams — responsible for daily banking transactions and reconciliation workflows.
- ERP Finance Specialists — support integration between banking platforms and finance ledgers.
- Finance Transformation Professionals — involved in automation, process redesign and treasury technology initiatives.
- Shared Services Finance Teams — manage high-volume reconciliation activities across multiple entities and accounts.
- Senior Finance Professionals — responsible for strengthening financial control, process efficiency and cash information quality.

## Course outline

---

### Bank Reconciliation Foundations and Multi-Bank Processes

This module establishes the operational framework for Bank Reconciliation across complex oil and gas banking structures. It examines how treasury and finance teams control bank information, identify transactions and maintain

accurate reconciliation records across multiple accounts and banking relationships.

### Bank Statement Formats and Automated Matching

This module focuses on the data structures that support automated reconciliation. Participants examine bank statement import processes and develop practical approaches for using structured banking information to improve transaction matching.

### Exception Handling and Multi-Currency Reconciliation

This module addresses the transactions that prevent straight-through reconciliation. It focuses on exception handling, investigation procedures and reconciliation for multi-currency bank accounts.

### ERP Bank Ledger Integration and Project Accounts

This module examines how bank transaction information connects with ERP finance environments and project accounting structures. The focus is on maintaining reliable data flows between banks, treasury systems and accounting ledgers.

### Joint Venture Reconciliation, Controls and Automation Governance

This module brings the reconciliation process together within complex petroleum operating structures. It focuses on joint venture bank account reconciliation, control governance, automation performance and continuous improvement.

### Scheduled dates

| Dates            | Venue                           | Format    | Fee    |
|------------------|---------------------------------|-----------|--------|
| 05 - 09 Oct 2026 | Abu Dhabi, United Arab Emirates | In person | £4,100 |
| 05 - 09 Oct 2026 | Abuja, Nigeria                  | In person | £4,100 |
| 05 - 09 Oct 2026 | Accra, Ghana                    | In person | £4,100 |
| 05 - 09 Oct 2026 | Addis Ababa, Ethiopia           | In person | £4,100 |
| 05 - 09 Oct 2026 | Al Ain, United Arab Emirates    | In person | £4,100 |
| 05 - 09 Oct 2026 | Al Khobar, Saudi Arabia         | In person | £4,100 |
| 05 - 09 Oct 2026 | Alberta, Canada                 | In person | £4,100 |
| 05 - 09 Oct 2026 | AlUla, Saudi Arabia             | In person | £4,100 |
| 05 - 09 Oct 2026 | Amman, Jordan                   | In person | £4,100 |
| 05 - 09 Oct 2026 | Amsterdam, Netherlands          | In person | £4,100 |
| 05 - 09 Oct 2026 | Athens, Greece                  | In person | £4,100 |
| 05 - 09 Oct 2026 | Baku, Azerbaijan                | In person | £4,100 |

| Dates            | Venue                        | Format    | Fee    |
|------------------|------------------------------|-----------|--------|
| 05 - 09 Oct 2026 | Barcelona, Spain             | In person | £4,100 |
| 05 - 09 Oct 2026 | Berlin, Germany              | In person | £4,100 |
| 05 - 09 Oct 2026 | Boston, United States        | In person | £4,100 |
| 05 - 09 Oct 2026 | Brussels, Belgium            | In person | £4,100 |
| 05 - 09 Oct 2026 | Budapest, Hungary            | In person | £4,100 |
| 05 - 09 Oct 2026 | Cairo, Egypt                 | In person | £4,100 |
| 05 - 09 Oct 2026 | Cape Town, South Africa      | In person | £4,100 |
| 05 - 09 Oct 2026 | Casablanca, Morocco          | In person | £4,100 |
| 05 - 09 Oct 2026 | Dammam, Saudi Arabia         | In person | £4,100 |
| 05 - 09 Oct 2026 | Dhahran, Saudi Arabia        | In person | £4,100 |
| 05 - 09 Oct 2026 | Doha, Qatar                  | In person | £4,100 |
| 05 - 09 Oct 2026 | Dubai, United Arab Emirates  | In person | £4,100 |
| 05 - 09 Oct 2026 | Edinburgh, United Kingdom    | In person | £4,100 |
| 05 - 09 Oct 2026 | Edmonton, Canada             | In person | £4,100 |
| 05 - 09 Oct 2026 | Frankfurt, Germany           | In person | £4,100 |
| 05 - 09 Oct 2026 | Geneva, Switzerland          | In person | £4,100 |
| 05 - 09 Oct 2026 | Houston, United States       | In person | £4,100 |
| 05 - 09 Oct 2026 | Istanbul, Turkey             | In person | £4,100 |
| 05 - 09 Oct 2026 | Jakarta, Indonesia           | In person | £4,100 |
| 05 - 09 Oct 2026 | Jeddah, Saudi Arabia         | In person | £4,100 |
| 05 - 09 Oct 2026 | Jubail, Saudi Arabia         | In person | £4,100 |
| 05 - 09 Oct 2026 | Khamis Mushait, Saudi Arabia | In person | £4,100 |
| 05 - 09 Oct 2026 | Kigali, Rwanda               | In person | £4,100 |
| 05 - 09 Oct 2026 | Kuala Lumpur, Malaysia       | In person | £4,100 |
| 05 - 09 Oct 2026 | Lisbon, Portugal             | In person | £4,100 |
| 05 - 09 Oct 2026 | Liverpool, United Kingdom    | In person | £4,100 |

| Dates            | Venue                            | Format    | Fee    |
|------------------|----------------------------------|-----------|--------|
| 05 - 09 Oct 2026 | London, United Kingdom           | In person | £4,100 |
| 05 - 09 Oct 2026 | Los Angeles, United States       | In person | £4,100 |
| 05 - 09 Oct 2026 | Luanda, Angola                   | In person | £4,100 |
| 05 - 09 Oct 2026 | Madrid, Spain                    | In person | £4,100 |
| 05 - 09 Oct 2026 | Manama, Bahrain                  | In person | £4,100 |
| 05 - 09 Oct 2026 | Marbella, Spain                  | In person | £4,100 |
| 05 - 09 Oct 2026 | Marrakech, Morocco               | In person | £4,100 |
| 05 - 09 Oct 2026 | Miami, United States             | In person | £4,100 |
| 05 - 09 Oct 2026 | Milan, Italy                     | In person | £4,100 |
| 05 - 09 Oct 2026 | Munich, Germany                  | In person | £4,100 |
| 05 - 09 Oct 2026 | Muscat, Oman                     | In person | £4,100 |
| 05 - 09 Oct 2026 | Nairobi, Kenya                   | In person | £4,100 |
| 05 - 09 Oct 2026 | New York, United States          | In person | £4,100 |
| 05 - 09 Oct 2026 | Nice, France                     | In person | £4,100 |
| 05 - 09 Oct 2026 | Nouakchott, Mauritania           | In person | £4,100 |
| 05 - 09 Oct 2026 | Oslo, Norway                     | In person | £4,100 |
| 05 - 09 Oct 2026 | Paris, France                    | In person | £4,100 |
| 05 - 09 Oct 2026 | Port Louis, Mauritius            | In person | £4,100 |
| 05 - 09 Oct 2026 | Prague, Czech Republic           | In person | £4,100 |
| 05 - 09 Oct 2026 | Pretoria, South Africa           | In person | £4,100 |
| 05 - 09 Oct 2026 | Riyadh, Saudi Arabia             | In person | £4,100 |
| 05 - 09 Oct 2026 | Rome, Italy                      | In person | £4,100 |
| 05 - 09 Oct 2026 | Sarajevo, Bosnia and Herzegovina | In person | £4,100 |
| 05 - 09 Oct 2026 | Sharm El Sheikh, Egypt           | In person | £4,100 |
| 05 - 09 Oct 2026 | Singapore                        | In person | £4,100 |
| 05 - 09 Oct 2026 | Stockholm, Sweden                | In person | £4,100 |

| Dates            | Venue                           | Format    | Fee    |
